FIELD TRIP

October 2019

THE ADITYA BIRLA INTEGRATED SCHOOL

Grade - 3, 4

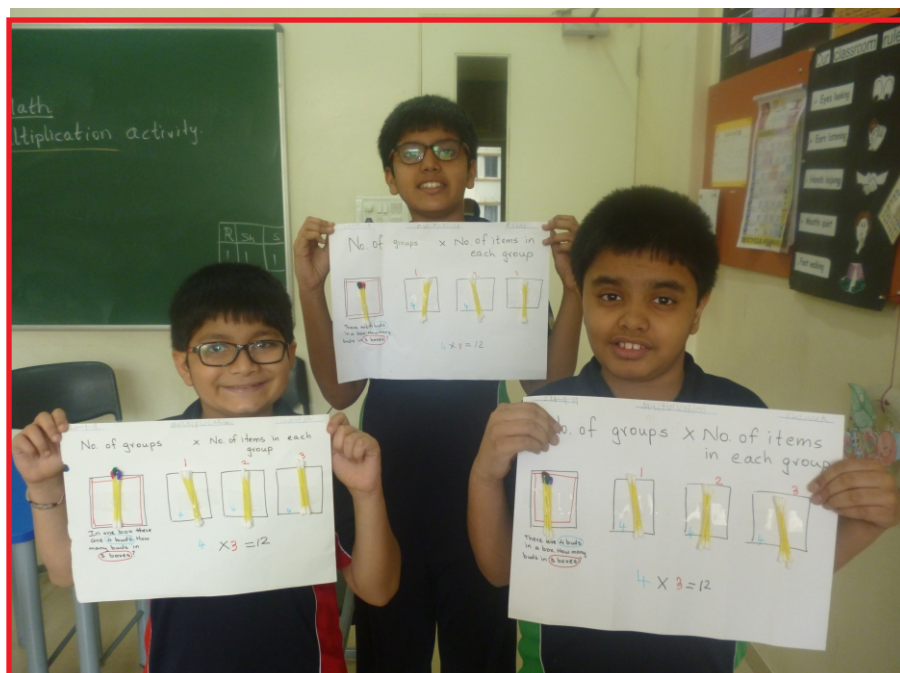

Activity Based Learning

Students got the ingredients such as chutney, cheese, butter, bread and corn. The students were guided to apply butter, lay a slice of cheese, apply chutney and fill it with corn. They learnt independent skills which are important for daily living. It works on the eye hand co-ordination and fine motor skills.

Multiplication Activity

The students were given an item and the number of groups which they segregated according to colour and then applied multiplication concept.

Grade - 4
School Assembly

The students of grade 4 warmly welcomed Lord Ganesha as a part of their assembly. Reasons why we celebrate Ganesh Chaturthi, 10 most famous pandals of Ganapati, a quiz on how much people know about Lord Ganesha and a video on encouraging people to use eco-friendly Ganapati was presented by the students.

Grammar - Noun Gender

This activity was conducted to reinforce the two noun gender forms taught. The children had to give examples of the gender depending on whether the masculine or feminine prop was shown.

Grade - 1

This activity was conducted to revise the 4 different types of noun gender. The children were encouraged to write the examples of noun gender they remembered. It was written on a paddle which gave them a revision of all types of noun gender taught in just one glimpse.

Grade - 2

Occupational Therapy and Speech Therapy Workshop for TABIS parents.

Workshop

Parents are the first and best role models for their children. The speech workshop was focused on the parents being effective communicators for their children. The parents were given strategies and tips that would help them communicate with their children in the most natural environment. Parents were also briefed about the role of communication in behavior management and social skills that are required to enhance life skills.

The Occupational therapists gave insight regarding “Autism Spectrum Disorder”. A brief idea about what Autism Spectrum disorder is and recent research on it and how Sensory Integration Therapy plays a major role in management of Autism Spectrum Disorder. Various home program strategies were provided to the parents which was followed by a question answer round where in queries of the parents were addressed.
